Towards sustainable digitalization

by design and strengthening social relations
(concluding workshop)

D-68163 **Mannheim**, Julius-Hatry-Str. 1

9th January 2023 from 9:30 am to 5:00 pm

(turn for more details)

Registered participants can join online this day.

The next day, 10th January, will be reserved for conclusions and drafting of ethical guidelines by a smaller group from 9:00 am to 3:00 pm.

Wellbeing of our societies and in the working situation depends more and more on digital solutions. Which choices can lead to a sustainable development on all three levels: economy, ecology and social life ?

In the Mannheim workshop we will learn how different projects in Germany and Finland make a sustainable use of digitalization in order to strengthen social relations between individuals and not create new division. Also the use of “green IT” will be presented.

By participating to the workshop you will contribute to the process of drafting ethical guidelines for a sustainable digitalization, which will be the outcome of the project co-funded by the European Union via ERASMUS+ programme.

Wellbeing of digitalized societies and workplaces
